

Terrazzo Mix 300 Pro Crete

DESCRIPTION:

One-component dry mix of fillers, binders, and aggregates. When mixed with water, it forms a terrazzo matrix suitable for countertops, tabletops, plant pots, chairs, and similar applications. Terrazzo Mix-300 is also suitable for cast in site terrazzo floors

WHERE TO USE:

Terrazzo Mix 300- Pro Crete is a professional product intended for professional applicators. It is best suited for the following applications:

- Countertops
- Plant pots
- Tables and chairs
- Decorative floorings

FEATURES AND BENEFITS:

- High strength and durability
- Easy to use with a mixing ratio of 20%
- Comes in white color mixed with black basalt aggregates
- Optional colors available upon request
- Can be colored at site using Decorete powder pigments
- Optional sealer available (Deco Resin) for extra protection
- Optional primer available (Deco Bond SBR) for better adhesion
- Other synthetic-colored aggregates from Decorete available (sold separately) for decoration.

HOW TO USE:

- Pour the mixture into the mold and compact it thoroughly.
- For small objects, the product can usually be removed from the mold after 24 hours of curing at 25°C. For floors and large objects, allow the product to cure for a minimum of 3 days at the same temperature to achieve maximum strength.

- Once the product has cured, sanding is necessary to achieve the desired smooth and shiny surface. The time required for sanding may vary based on factors such as the size of the surface, the initial condition of the product, and the desired finish. The procedure typically involves using a mechanical grinder with gradually finer grits of sandpaper until the surface is smooth and polished. It is important to have patience and take care not to over-sand, as

This can damage the surface. It may take some time and effort to achieve the desired results, but the result will be worth it.

- Sealing is optional but recommended. Use wax as a sealing coat or Deco Resin clear epoxy if desired.
- For priming, use Deco Bond SBR if necessary.

NOTES FOR PROFESSIONALS

- Perform a small test patch before starting the project to ensure the product meets your specific needs
- Priming may be required depending on the substrate
- Deco Resin is not recommended for outdoor use
- Sanding may take more than 24 hours to achieve desired results
- Extra reinforcement might be needed subject to site conditions
- Expansion joints must be incorporated into the design
- Other colors of Terrazzo Mix 300 – Pro Crete are available upon request, and the product can be colored on-site using Decorete powder pigments (sold separately). It can also be used to create cast-in-place terrazzo floors. Contact our sales team for more information or to place an order.

TECHNICAL DATA:

- Drying Time: 8-12 hours
- Initial Curing 3 days
- Full Curing: 7 days hours
- Available colors: White
- For options of aggregates colors, refer to the catalog.
