Revolutionary Flooring Systems

Company's Mission

To provide the Jordanian & regional markets with innovative, high quality and reasonably priced decorative solutions, offering an alternative to exterior decorative finishing that would add value to properties while offering unique sustainable flooring and exterior finishes.

Decorete focuses on providing its clients with a unique identity through customized decorative solutions tailored to fit the project requirements and budget, through offering a large variety of coloring and finishes that adhere to the specific design requirements. Customer satisfaction is at the core of Decorete's objectives, and thus Decorete provides its clients with a comprehensive service, ranging from manufacturing and supply of finishing materials, to design, application and maintenance.

Company's Vision

Decorete aims to become a synonym to high quality innovative decorative solutions, through expanding the market's awareness of alternative finishing options, and creating opportunities to add value to real estate through unmatched exterior finishing.

Decorete's vision is to integrate state of the art decorative solutions into the design of construction projects, pushing the edge of the envelope into advanced applications that provide the company with the tools to become a leader in its field.

Decorete's vision is to expand its product range through exploring new manufacturing technologies and adapting those technologies into innovative decorative applications, further expanding the alternatives of the market and upgrading the image and value of its clients' projects.

Stamped Concrete

Revolutionary Flooring Systems

Stamped Concrete is a decorative method of using patterns on concrete to resemble brick, slate, flagstone, stone, tiles and even wood.

It is commonly used to add unique decorative identity to pool decks, driveways, entries and courtyards, and patios as an alternative to tiles, pavements or the like.

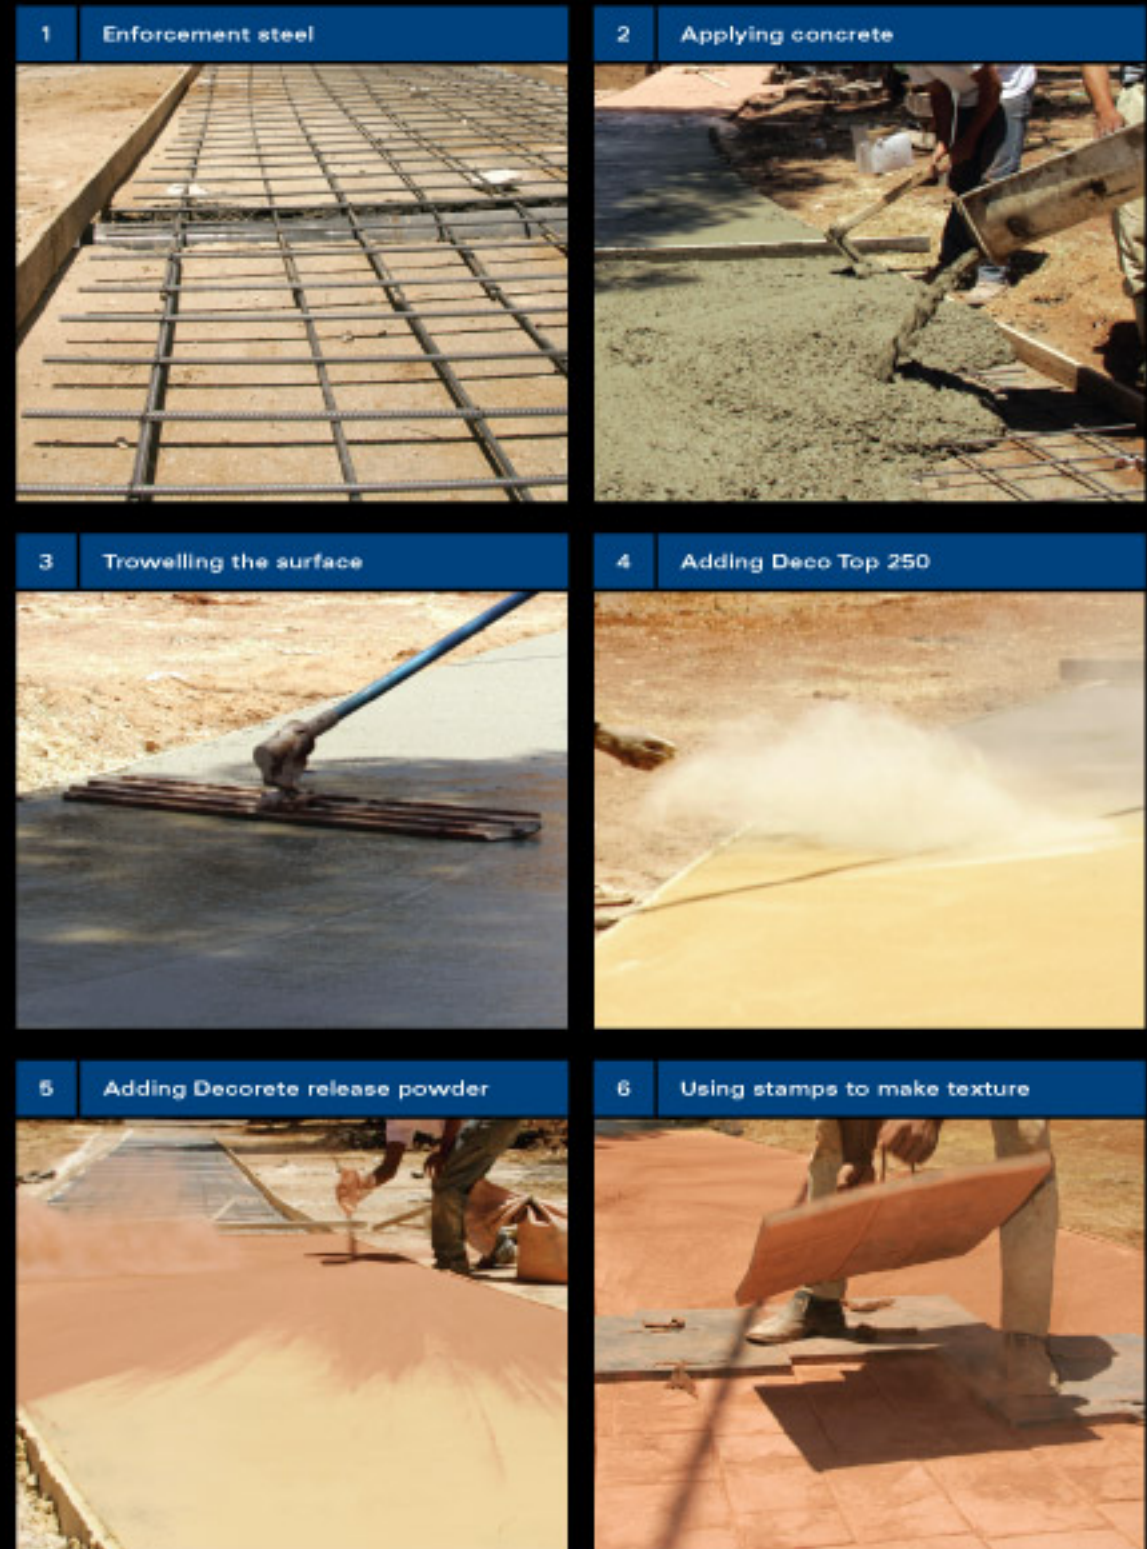

Indoor

The use of stamped concrete is growing due to its versatility, attractive appearance, affordable prices, durability and cost.

Application Steps

The method and materials used in applying stamped concrete guarantee durability & resistance to environmental conditions.
