

Deco Resin UV

Liquid Glass

DESCRIPTION:

UV resin belongs to the group of synthetic resins, it is a one component, and it can be used immediately without the need to mix with a hardener.

UV resin cures completely within a few minutes with the help of a special UV lamp

Deco Resin UV is perfectly suited for resin jewelry making, garment accessories and other DIY crafts.

Features:

Fast Curing: Will cure completely hard under a 6W mini UV lamp in only two minutes (One minute curing for each side). It can also be cured under direct sunlight but will take longer time.

INSTRUCTIONS FOR USE:

When working with UV resin patience is essential to achieve a perfect result. If you take enough time, pour thin layers of resin and harden them, you can prevent air bubbles from forming in the resin, which then have to be removed.

If some air bubbles have formed in the resin, they can easily be removed with a hot air dryer. Run hairdryer over the resin in quick movements. Be careful not to stay in one place for more than 1 to 2 seconds at most. As the heat can cause vapors to form, you should carry out this procedure in a well-ventilated room. It is also extremely important that you protect yourself with gloves, a face mask and safety glasses.

UV resin is very sensitive to heat compared to normal epoxy resin. If it gets too hot, an acrid smell will develop. Therefore the temperature at the hot air dryer, if it is used, should be kept as low as possible.

For a good curing result, you need around 4 watts to have a curing time of around 2-3 Minutes.

You can use all kind of colors, like color pastes, Alcohol Inks, Airbrush colors and pigments.

If sun light is used for curing instead of UV light; Direct Sun (Sunny Day): 10-15 mins

Direct Sun (Cloudy Day): 30-60 mins

PACKAGING:

Deco Resin UV is available in 100, 250, 500, 1000 ml packages.

STORAGE:

This product is sensitive to light and heat and needs to be stored in a cool, dry place, protected from light

SAFETY - HEALTH:

Deco Resin UV is flammable, keep away from heat sources.

Keep out of reach of children. In case of contact with eyes, rinse immediately with plenty of clean water and seek medical advice. After contact with skin, wash immediately with plenty of clean water. Wear suitable protective clothing, gloves and eye/face protection.

Cleaning:

All tools and equipment should be cleaned immediately after use with Solvent 10. Hardened material can only be removed mechanically.

SERVICES:
